Hi James,

Just a quick note to say Two Day Town has been the highlight of my husband and my year. It is an outstanding blending of music and art with an amazing outdoor environment. Immersed in nature, the panorama of the lake couldn't have been more relaxing while listening to and playing music. A sense of community was achieved in two short days and everyone we witnessed (staff, musicians, guests) was polite, respectful and just happy to be in such a beautiful place.

In the words of the EBRPD whose Vision statement is to achieve an extraordinary open space parkland in Contra Costa County, the district will "provide a diversified system of regional parklands, trails and related services that will offer *outstanding opportunities for creative use of outdoor time.*"

If camping next to a serene lake while listening to and playing live music over a weekend isn't an outstanding opportunity for creative use of outdoor time, I don't know what is.

Please help Two Day Town continue for generations.
